

# Expanded Simplice® Kitchen Faucet Collection

Kohler introduces Simplice semi-pro, touchless, bar and laundry faucets.

Due to the success of the Simplice faucet collection, KOHLER® is launching additional kitchen faucet configurations to coordinate kitchen, bar and laundry spaces. The Simplice collection combines an elegant, universal design with exceptional ergonomics and functionality.

The new semi-pro faucet is perfect for the home chef looking for functionality. The three-function pull-down sprayhead allows you to easily switch from aerated steam to Sweep® spray to Boost function. Sweep spray creates a wide, forceful blade of water for superior cleaning while the NEW Boost Technology increase the flow rate by 30% with the touch of a button. The magnetic docking arm securely locks the sprayhead into place. The semi-pro will be IMAP protected.

Coordinate the secondary space using the Simplice bar faucet. The high-arch swing spout with 360-degree rotation offers superior clearance for filling pitchers, chilling bottles, and cleanup.

The laundry faucet will be available in early February while Simplice with Response® Touchless Technology will be available in May.
